

Kyungdong University Global — Project Overview

Website (React) + CMS Backend (PHP/MySQL) — One-page summary

Frontend: `kdu-global-website` · Backend: `C:\xampp\htdocs\kdu-backend` · Doc date: 31 Jul 2026 · Full docs: `docs/KDU-Global-Project-Documentation.docx`

1. What this project is

Public university website + CMS so admins, HODs, faculty, and club leads update content without developers.

- **Frontend:** React 19, Vite 6, React Router 7 — `localhost:5173`
- **Backend:** PHP 8 + MySQL (`kdu_backend`) — `/kdu-backend/public`
- Dev proxy: `/api` & `/media` → XAMPP backend
- Only **published** CMS content appears on the live site

2. Main public pages

Area	URLs
Core	<code>/</code> Home, About, Admissions, Contact, News
Undergraduate	<code>/academics/undergraduate/:slug</code> (+ faculty, projects)
Graduate	<code>/academics/graduate</code> , ... <code>/faculty</code>
Engagement	<code>/engagement</code> , clubs <code>/engagement/clubs/:slug</code>
Other	Research, International Office, Sitemap

3. Programmes

Smart Computing · IBA (`iba`) · EAP (`eap`) · AI · IHM (`ihm`) · KAP (`kap`) · Graduate (K-Global GSBTC)

7. Local setup (quick)

Backend	Frontend
Start XAMPP Apache + MySQL <code>mysql -u root kdu_backend < database/install.sql</code> <code>php scripts/create_root.php ...</code> CMS: <code>.../public/cms/</code> · Faculty: <code>.../cms/faculty/</code>	<code>npm install</code> · <code>npm run dev</code> Open <code>http://localhost:5173</code> Leave <code>VITE_API_URL</code> empty in dev

8. Useful APIs

Public: `/api/site/content` · `/api/{dept}/faculty|news|events|content` · `/api/clubs` · `/api/graduate/faculty` · `/media/...`
CMS (login): `/api/cms/content` · `/api/cms/faculty/me` · `/api/cms/{dept}/faculty-users` · `/api/cms/clubs`

9. Troubleshooting

- Published but site unchanged → hard-refresh; check `/api/site/content` has values
- Broken images → use Upload (not long XAMPP paths); keep faculty photos out of site hero
- MySQL error 2002 → start MySQL in XAMPP
- Faculty missing on 2nd department → save affiliations + publish profile

KDU Global Website & CMS — one-page overview (v1.0). For full detail see the multi-page documentation in the same `docs` folder.

4. CMS roles

Role	Can manage
Root	Users, site content, clubs catalog, settings
HOD	Own department pages, news, events, faculty accounts
Faculty	Own profile, photo/CV; multi-department listing
Dean Graduate	Graduate content / events / news
Intl. Office	International content / events / news
Club Admin	Assigned club only (created by Root)

5. Key workflows

- **Site content:** Root → Website content → Publish → refresh site
- **Department:** HOD edits pages/news/events → publish
- **Faculty:** one profile; tick multiple departments + Graduate
- **Clubs:** Root creates club → creates Club Admin → admin publishes club

6. Media folders

`faculty/` · `site/` · `news/` · `events/` · `clubs/` under `storage/uploads/`
→ served as `/media/...`
